Overview

In the first half of 2023, China's economy gradually recovered and demonstrated resilience. However, the process advances amid difficulties and it takes time for full recovery and restructuring. Meanwhile, favourable national initiatives and government policies, improving consumer demand for insurance and reform of China's financial regulatory system all present opportunities for insurers' long-term development, and call for further improvement in insurers' corporate governance and business management.

CPIC stayed focused on core business of insurance, remained committed to value growth and long-termism. We achieved encouraging overall business results and enhanced comprehensive strength. CPIC Life deepened the Changhang Transformation, and achieved balanced business development and steady value growth. CPIC P/C pursued precise business management, with sustained improvement of business quality and mix. Asset management further improved sustainable ALM system, and reported solid investment results. In the meantime, we constantly optimised customer-oriented business operation, implemented strategies in health care & elderly care management, business development in key regions and technology empowerment, achieving notable breakthroughs in value creation and capability building.

Unveiled “352” health care strategy roadmap to improve “insurance + health management” system

Insurance payment

- Focused on protection coverage and claims payment, upgraded product and service system underpinned by high-quality health-care big data to enhance insurance payment capabilities

Service empowerment

- Provided integrated “insurance + health + retirement” solutions in response to diverse customer needs, empowering core insurance business via competitive service offering

Building ecosystems

- Built health care ecosystems via industrial equity fund and charitable fund to better support real economy and people’s well-being

A differentiated approach towards Regional Integrated Development and innovation in insurance supply to boost development drivers

Focused on Greater Bay Area, with reach extended to Hong Kong and Macao, innovation in products and service boosted our visibility and competitiveness

- Rolled out “Motor Insurance Service Connect” programme between Macao and the mainland, and between Hong Kong and the mainland, with Operational Centre in South China providing integrated and specialised customer service
- Hong Kong residents also have access to CPIC Home and CPIC Family Doctor, which enhanced the competitiveness of our insurance products in Hong Kong

Contributed to green insurance and the value chain of NEV

- Launched insurance against losses from carbon emissions reduction, green buildings malfunction, and income loss of PV power generation to promote green insurance development
- New business model for NEV up and running, contributing to roll-out of vertical business management system and integrated sales and service system nation-wide

Built technology innovation centre, with scenario-based application of frontier technology

- Leveraged R&D Centre and Data Centre in Chengdu, formulated mechanisms for collaboration in innovation with technology team of business units, and explored scenario-based application of frontier technology

Explored new model in supply of health protection, diversified offering in health care and elderly care

- Joined hands with China West Hospital to explore trials of inclusive health insurance with complementarity of social and commercial insurance, offered personalised solutions for substandard risks, i.e., people in sub-health, with illnesses or chronic illnesses, as well as key customer segments of the elderly and children

Accelerated digitalisation via big data, diversified scenario-based application to empower core insurance business

CRM

Developed integrated digital solution for individual customers, which enabled targeted customer insights from Group's perspective and dynamic matching of business strategies.

Smart claims management

Independently developed control platform for unmanned aerial vehicles. The platform can generate and execute aerial photography according to location of land under coverage, with accurate results of loss-adjustment returned in 3-5 seconds, which effectively empowered agricultural insurance in cost reduction and efficiency improvement.

Smart operation

Continued to roll out RPA application, with establishment of professional, intelligent "smart factories" on a large scale which require no men on duty, replacing a monthly average of 400 workers.

Digital employee

Launched a digital employee for IA quality control based on large-scaled AI modelling, which can take on and accomplish internal auditing tasks through natural language dialogues, marking a milestone in digitalisation of labour force.

Risk control of asset management

All-around automation via multiple AI technologies of traditional manual work, such as collection of information on adverse publicity, financial analysis, analysis of financial data risk warning, prompting a shift of business model of asset management from "passive defense" to "pro-active service".

Outlook

Since the beginning of the year, China's economy gradually recovers with orderly advancement of restructuring and improving insurance consumption confidence, which paves the way for industry's quality development and growth in the future. Financial regulators attach greater importance to industry's value proposition in risk protection and contribution to China's development. We are confident that we can facilitate the country's social and economic transitioning via accelerating supply-side reform and meeting customers' diverse needs in health care & elderly care management, and wealth management, and achieve high-quality development of the Company in the process.

Going forward, under the guidance of the New Development Philosophy, CPIC will accelerate capacity-building, persist in value creation, adhere to customer-oriented business operation, stay focused on long-termism, step up technology empowerment to boost drivers of development, promote collaboration and synergy to unlock potential, and strengthen risk management to secure achievements. We will stay confident and patient, move forward in response to trends of our times and needs of our customers, to attain industry leadership in high-quality development.

Q&A
